EDUCATION

University of Toronto

Toronto, ON

Honours Bachelor of Science - Computer Science Major, Applied

Sep. 2023 - Present

Mathematics & Applied Statistics Minors

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Databases, Software Design, Software Engineering, Information Security, Computer Organization, Computational Complexity

PROFESSIONAL EXPERIENCE

Nirvo

Jan. 2026 - Apr. 2026

Full-Stack Developer

- Led development of the admin dashboard for a **Next.js/React** application, building core **user and session management workflows** across overview and administration views.
- Implemented **lifecycle controls** for user accounts and sessions, including deactivation, reactivation, deletion, editing, cancellation, **filtering, and pagination**.
- Refined landing-page and admin-dashboard UX through **responsive typography, interaction polish**, and hover-animation cleanup across production-facing interfaces.

SOFTWARE ENGINEERING PROJECTS

StudyFlow - AI-Powered Study Management Platform (In

Progress) | Next.js, React, TypeScript, Supabase, PostgreSQL,

Jul. 2026 - Present

Gemini API, Tailwind CSS

- Architected a **full-stack academic management platform** for courses, assignments, calendars, grades, and uploaded learning materials.
- Engineered course-specific document workflows with PDF extraction, text chunking, **vector embeddings, semantic retrieval, automated summaries**, and structured study-note generation.
- Implemented **secure authentication, row-level database security, private file storage**, ownership validation, generation quotas, and atomic background-job claiming.
- Hardened AI generation workflows with **runtime validation, retry/fallback handling**, persistent job states, and a **51-test automated test suite** covering reliability and core application behavior.

Hush - Full-Stack Real-Time Messaging Platform | React 19,

Node.js, Express, Socket.IO, MongoDB, Zustand, Clerk,

Jul. 2026

ImageKit, Docker

- Engineered a **real-time messaging platform** supporting direct and group conversations, typing indicators, presence tracking, **delivery/read receipts**, reactions, replies, message search, pins, and **rich-media sharing**.
- Designed **secure backend authorization** for friendships, group membership, administration, blocking, reporting, and moderation using **signed Clerk webhooks**, server-side validation, **rate-limited uploads**, and protected media access.
- Implemented **cursor-based pagination** and synchronized client state with **Socket.IO** events, then packaged the React SPA and Express API into a production-ready **multi-stage Docker deployment**.
- Built **automated backend and frontend tests** covering authentication boundaries, messaging, groups, moderation, pagination, receipts, media validation, and privacy controls.

Personal Portfolio - Interactive Desktop Experience | React 19,

Sep. 2026

Vite, JavaScript, CSS

- Engineered an **interactive desktop-style portfolio** in React with a reusable **window-management system** supporting focus, minimize/maximize, drag, resize, responsive mobile behavior, and persistent light/dark themes.
- Built a **simulated file system** and **terminal experience** with command execution, **command history, tab completion**, project/document viewers, and responsive interactions for showcasing projects, experience, and contact information.

Coding Quest Competition | Competitive Programming

Oct. 2022

- Represented the International School of Kuala Lumpur (ISKL) in Coding Quest; the team placed **1st overall** in the competition.
- Recorded multiple **top-10, top-20, and top-30 global problem solves** during the competition.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, JavaScript, TypeScript, HTML/CSS, Bash, R, RISC-V Assembly

Frameworks & Libraries: Next.js, React, Express.js, Tailwind CSS, Socket.IO, Zustand, Vite

Databases & Backend: PostgreSQL, MongoDB, Supabase, REST APIs, authentication & authorization

Tools & Systems: Git/GitHub, Docker, Linux, VS Code, IntelliJ, NetBeans

Core Concepts: Data Structures & Algorithms, Unit Testing, Debugging, Agile Development, Prompt Engineering
